Areas of business development

Development strategy

Business development of **Spie batignolles** in **Canada**, through its subsidiary **Spie batignolles Canada Inc.**, is primarily oriented towards two areas of expertise :

- **Civil engineering**, especially in **tunnels**
- **Special foundations**

Market studies tend to show that Spie batignolles has its place in Canada in these two niches.

Civil engineering

Spie batignolles Génie Civil has all the skills in all areas :

- Engineered structures
- Industrial facilities
- Underground works
- Local works

Civil engineering

The strenghts

- More than 700 employees
- An integrated technical department
- Own equipment park
- Multidisciplinary teams
- Project management expertise
- 91% satisfied customers
- A long history
- Many references

Contracting Authorities :
SOCIETE DU GRAND PARIS and
RATP

Engineering : various groups

Tunnels lengths :

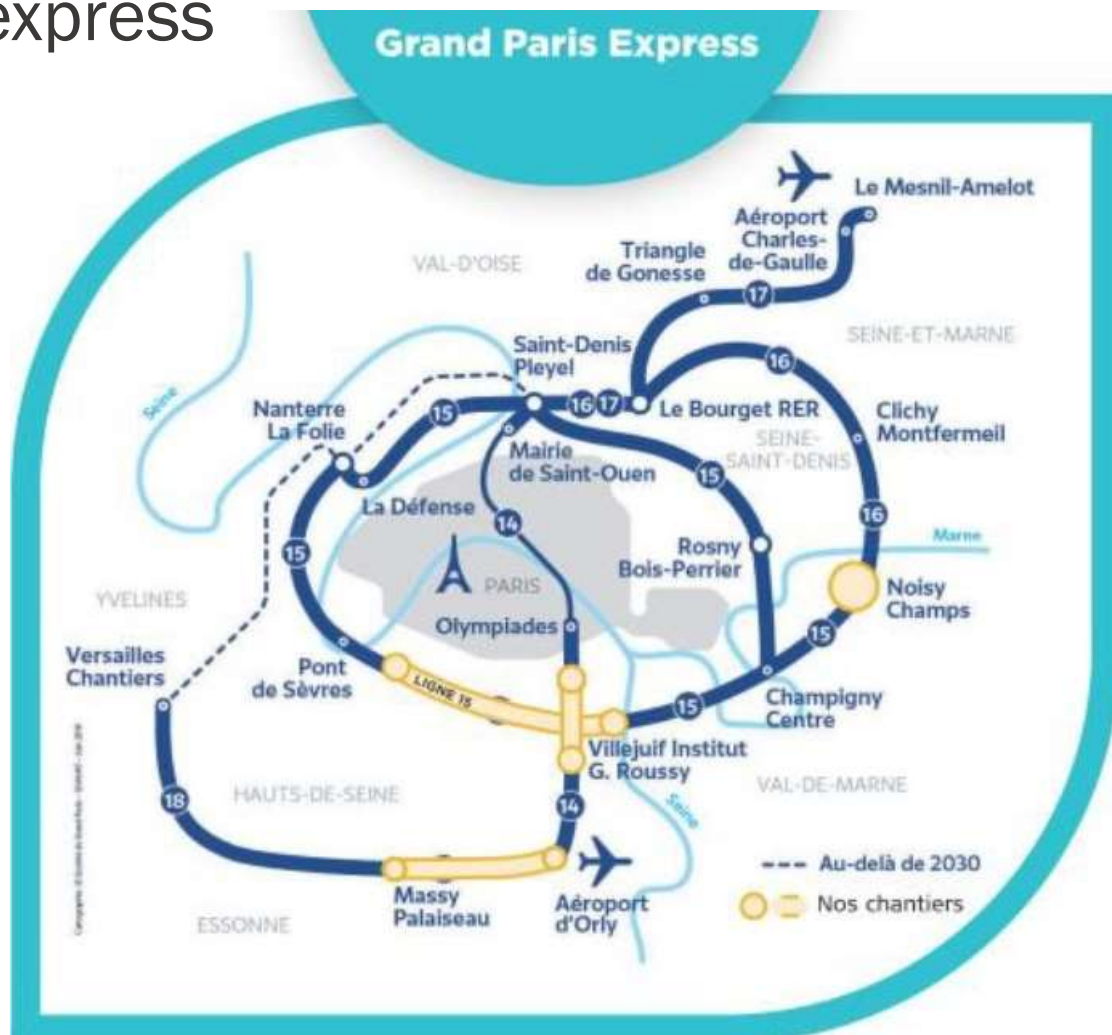

L15 south T3C : 8,2 km

L14 south GC02 : 4,6 km

L18-1 : 11,8 km

L18-3 (in progress) 6,7 km

Tunnels excavated with TBM
(10m diameter) and concrete
segments lining, at great
depth, in heterogeneous soils,
in a very urban environment.

Special foundations

Spie batignolles fondations is a major player in special foundations in France and abroad, for public works, industry, construction and buildings.

It studies and carries out any project of :

- deep foundations,
- Supporting walls,
- underpinnings,
- ground anchors and soil treatments.

Special foundations

The strenghts

- More than 500 employees
- An integrated design office
- A material department of 65 people
- Machines built in-house, therefore adaptable
- 64 years of history
- Research and development, with many patents

Special foundations

Material depot (60.000 m²)

Machines improvement

4 different versions of our Rotoforeuse® HEVA
